

WORK STARTED AT LUCKY BOY.

GEN'L MANAGER JONES LEAVES WITH MEN AND PROVISIONS.

Company Well Financed—Big Showing in Development Operations to be Made—Group Has Bonanza Ledge—Fine Free Milling Ore—Mill Will Probably be Installed This Summer—New York People to Look at Property.

A. P. Jones, president and general manager of the Lucky Boy Gold Mining company, left yesterday for the property with a large crew of men and an ample stock of provisions to begin operations. P. D. Healy, it will be remembered, succeeded in financing the Lucky Boy on a recent trip which he made to his old home at Worcester, Massachusetts, for this purpose. Ample funds were provided for carrying on development work.

The Lucky Boy group is located in the Bonanza district and includes five full claims with an abundance of good timber in the vicinity for all purposes. The property is one-half mile south of the Bonanza, and it is thought beyond any question to contain a continuation of the famous Bonanza ledge, which at once makes it a proposition of more than ordinary promise. All told the development work previously done amounts to 380 feet of tunnel and a sixty-nine foot shaft, in good ore. During the former work on the property the ledge was crosscut on the eighty-foot level revealing a width of sixty feet in good free milling ore averaging about \$10 to the ton. The present purpose is to carry on operations extensively during the coming summer and get things in shape for a mill which will probably be installed later in the season. A party of New York capitalists is expected here in a short time to look at the property with a view to investing heavily in its stock.

The management of the Lucky Boy confidently expect to place the mine in the dividend paying class before the end of the season.

DR. BROCK HOME FROM CHICAGO

Attended Polyclinic Course and Met the Celebrated Dr. Lorenz.

Dr. L. T. Brock returned yesterday morning from Chicago, where he has been attending a course of polyclinic lectures for the past month. While away he heard some of the world famous specialists lecture. Among them was Dr. Lorenz, the celebrated Italian surgeon, whose success in bloodless surgery has attracted universal attention. Dr. Brock saw him perform several operations in reduc-

ing dislocations, and was much pleased with his methods.

On arriving at Baker City, Dr. Brock found Mrs. Brock and his daughter, Miss Jessie, both sick in the hospital. Mrs. Brock was taken sick on the train while going to Baker City several days ago. Both are somewhat improved, however, and accompanied him home.

SEWERS BADLY NEEDED.

City Official Says They Will Undoubtedly be Built This Summer.

It is now proposed to issue twenty year bonds for the construction of a sewer system. This, it is argued, will make it light on the property holders, and at the same time provide the much needed sewers. City Engineer Fenner is getting the profiles and estimates in shape for the city council to take action on the matter before long. Speaking of the situation a city official says: "There is no doubt in my mind but that the sewer system will be built this summer. The council is backed by public sentiment, and a drainage system is certainly badly needed. For instance, the alley between Granite and Sumpter streets is in a most wretched condition. All kinds of garbage is scattered about and the drainage from the restaurants and kitchens produce a most unsanitary effect."

WELL PLEASSED WITH THE CAMP.

Messrs. Snyder and Jones, of Duluth, Visit Their Properties.

A. Snyder and D. P. Jones, of Duluth, arrived in the city Sunday to look after their mining interests in this district. They made trips to several properties, but on account of the snow they were unable to accomplish very much. They left yesterday and will probably visit Salt Lake and California points where they are also interested, returning here later in the season before going back east, when their properties will be in better shape for examination.

Both gentlemen are highly pleased, however, with the outlook of the camp, and say that there is a wonderful increase in business here and throughout the camp since their last visit in January.

Ore Continues Rich.

R. C. Reese, superintendent of the Dixie Meadows Gold Mining company, came in from their camp yesterday and stated that the rich strike reported in last week's issue of The Miner, at the estimated value of \$75,000 per ton, is so far still holding out, and no decrease in its value is apparent, the stringer still measuring its three feet—and the company has no stock for sale either, aside from that already subscribed.—Prairie City Miner.

Mining deeds for sale at this office.

Victor Mining Co.

THE FIRST BLOCK
OF TREASURY STOCK IS NOW ON
THE MARKET

LOCATED
IN THE RED BOY
DISTRICT

THE PROPERTY
HAS BEEN WORKED ON FOR THE
PAST TWO YEARS

VALUES RUN
FROM \$50 TO \$300 PER TON IN
GOLD AND SILVER
